PROFILE

MCA student and aspiring Software Developer with hands-on experience in Python, Flask, JavaScript, MySQL, and SQL Server. Skilled in backend development, REST APIs, database management, OOP, and AI-powered applications. Seeking an entry-level Software Developer or Backend Developer role to apply strong programming and problem-solving skills.

TECHNICAL SKILLS

- **Programming** : Python | C | C++ | C# | JAVA | SQL
- **Web Technologies** : HTML | CSS | JavaScript
- **Backend & Frameworks** : Flask | ASP.NET | PHP
- **Database** : MySQL | SQL Server
- **Programming Concepts** : Data Structures & Algorithms | Object-Oriented Programming (OOP) | CRUD Operations | REST APIs
- **AI & Data Technologies** : Generative APIs | Data Processing | OCR
- **Version Control & Tools** : Git | GitHub | VS Code | Visual Studio | Figma
- **Other Tools & Platforms** : WordPress | Bubble.io | Zapier

EDUCATION

○ Master of Computer Applications (MCA) - Pursuing LJ University, Ahmedabad	2025-2027
○ Bachelor of Computer Application Semcom College, CVMU, Anand CGPA : 9.78/10	2022-2025
○ HSC Sunrise school, Palitana Percentage : 83.14%	2022

PROJECTS | [View Project Documentation](#)

- **DocChat AI - Intelligent PDF Assistant | Python, Flask, Gemini API, OCR | [GitHub](#) · [Live Demo](#)**
 - Developed an AI-powered PDF assistant for document summarization and context-based question answering.
 - Implemented PDF text extraction and OCR processing for text-based and scanned documents.
 - Integrated Gemini API and deployed the Flask application on render for live web access.
- **SecureAuth Pro - Authentication & User Management System | Python, Flask, MySQL | [GitHub](#) · [Live Demo](#)**
 - Developed a Flask-based authentication system with registration, login, password hashing, validation, and session management.
 - Implemented email OTP verification and role-based access control for secure user management.
 - Used Flask-SQLAlchemy and Flask-Migrate for database operations and deployed the application for online access.
- **Student Attendance Management System | ASP.NET, C#, SQL Server | [GitHub](#)**
 - Developed a web-based system for student attendance tracking, management, and reporting.
 - Implemented role-based access, CRUD operations, data validation, and database-driven attendance management.

CERTIFICATES | [View Certificates](#)

- Generative AI
- Advanced Git and GitHub Features
- Software Development Life Cycle (SDLC)
