| Git       | GitHub | Vercel      | Figma to HTML |
| Photoshop | Cursor | Antigravity |               |

## Projects :

|                                                                                                                                                                                                                                                                                                                           |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <u>Smart Students Help Platform</u>                                                                                                                                                                                                                                                                                       | June 2026 |
| • Smart Students Help Platform – Developed a responsive student support web application using HTML, CSS, JavaScript, Bootstrap 5, and Local Storage, enabling students to submit academic assistance requests and allowing administrators to manage, track, and update request statuses through an interactive dashboard. |           |

|                                                                                                                                                                                                                       |               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <u>Event Management Website</u>                                                                                                                                                                                       | December 2025 |
| • Developed a responsive event management website with a functional booking system. Implemented booking status using browser localStorage to store and manage data without a backend. Deployed the project on Vercel. |               |

|                                                                                                                                                                                        |               |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <u>Kayuu</u>                                                                                                                                                                           | November 2025 |
| • Built a fully responsive furniture e-commerce website featuring product categories, best-seller highlights, customer testimonials, and newsletter signup to improve user engagement. |               |

|                                                                                                                                                                                                                                                                                               |              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <u>A2Z Dental Clinic</u>                                                                                                                                                                                                                                                                      | October 2024 |
| • Developed a professional, responsive dental clinic website featuring detailed service listings (e.g., general dentistry, cosmetic treatments), a meet-the-team section, patient testimonials, and an appointment/contact form – built with a modern front-end stack and deployed on Vercel. |              |
